Penmann
INNOVATIVE CLIMATIC SOLUTIONS FOR THE FOOD INDUSTRY

NR-EC2600

NR-EC2600 Evaporative Cooler

Product Overview

High efficiency – capable of cooling large areas from a relatively small electrical load since no 'mechanical' cooling takes place

Suitable for open areas – such as warehouses, large factories, night-clubs, marquees & outdoor events as an alternative to traditional air conditioners

Compact footprint – fewer mechanical components reduce overall unit dimensions

Integral storage tank – requires water top up to provide cooling - it is also possible to connect these units to a constant mains water feed

Performance Data

Nominal Air FlowRate ..... 2,600 m^3/hr
Typical Cooled Area ..... 80 m^3

Electrical Data
Power Supply ..... 230/1/50 V/ph/Hz
Power Connection ..... 3 pin plug
Maximum Running Current ..... 1 A

Cooling Circuit
Integral Storage Tank Volume ..... 60 litres

Physical Data
Length ..... 700 mm
Width ..... 466 mm
Height ..... 1,017 mm
Maximum Operating Weight ..... 80 kg
